To Whom It May Concern:

I writing to express my interest in applying for the Junior Software Engineer position. I have a breadth of experience that I have gained while working in a variety of fields that would make me an asset to your company in this position.

My experience and qualifications are in line with the requirements you have listed for this position:

- I have been developing web applications using C#, JavaScript, HTML, .NET Framework, and ASP.Net for the past 3 years.
- I have used web services, including JSON, REST, and IIS.
- I have recently completed Amazon's 3-day Developing on AWS course.
- I have experience building and managing SQL databases with MSSQL.
- I have worked with Python, Ruby, and React on personal projects.

I find fulfillment in being challenged, in learning new ways to design user friendly applications, and in sharing my knowledge to others. I am eager to bring the same drive and propensity for learning that has allowed me to work successfully in a variety of fields to your company.

Thank you for your consideration. I look forward to hearing from you.

Sincerely,

Adriana Guerra
